WHOLESALE LIST

Terms and Conditions of Sale

This List Cancels All Previous Quotations

TERMS:

All prices are f.o.b. San Gabriel, Calif. All accounts due on the first and payable the 10th of second month following purchase (60 days) to nurserymen with established credit. Otherwise, C.O.D. 1% per month interest charged on overdue accounts. 5% discount for cash on delivery, or cash on picked-up orders.

PACKING:

Free on truck and carload shipments. Baling at cost (app. 5% of order.)

DELIVERY COSTS:

Southern California—free delivery to most areas.

Northern California—as indicated on bottom of catalog sheets.

Interstate Deliveries—we deliver to other states at a low delivery price, by semi trailer. Contact us for actual cost.

CLAIMS:

For any cause, claims must be made within ten days of receipt of stock.

GUARANTEE:

We accept all orders subject to crop conditions, and we reserve the right to cancel a portion of the stock, or all thereof, should injury befall our stock from hail, windstorm, frost, other weather conditions, error in count, insect and disease injury, or other natural causes beyond our control. We are careful to keep our varieties true to name and will replace any portion of the stock that may prove otherwise, or refund the price paid for such portions. It is agreed that the original price shall be the maximum damages the purchaser is entitled to.

QUANTITIES:

100 of one variety takes 100 rate.

OUR LOCATION:

Office, warehouse and yard—5 blocks east of corner of San Gabriel Blvd. and Las Tunas Blvd., 200 feet north of Las Tunas on Vista St., San Gabriel.

OUR SERVICES TO YOU

Our improved and modern methods of processing our deciduous stock, is designed to help you make a profit in this segment of your business. Only by your satisfaction with our material can we hope to continue to grow.

These numbered services are what we do for you (and indirectly for ourselves) from the first stages of growing, on through each step of processing, even into enabling you to say to your customer, "I know these trees are grown, handled and processed right."

1. All trees that require staking are tied with "Miracle Garden Tie." This makes certain that you will never receive trees from us that have been cut or girdled partially through with the use of twine or wire ties.
2. Daily during delivery season our heeling in grounds are completely sprinkled with overhead rainbird sprinklers to maintain proper moisture and humidity. This is important to prevent dehydration of upper branches of trees.
3. Also, our heeling in grounds are equipped with high pressure hoses for adequately soaking-in stored trees, to eliminate air pockets around the roots. This is very important to the later growth of trees. Trees and plants must be handled right in order to grow right.
4. All varieties of trees that are critical as to dehydration are dipped by us in "Wilt Pruf." This wiltprufing has been of great help to us and to our customers, to lessen the losses on bare root stock handling and storing in their nurseries. Wilt Pruf is a liquid plastic that dries on the tree trunk and limbs, is invisible, and has proven a terrific deterrent to drying out of deciduous stock.
5. We use moist shingletow on all deliveries. This prevents drying of the roots in transit, which is a potential source of trouble to deciduous stock.
6. Individual tags are supplied for each tree. Fruit tree tags give description of fruit and ripening date. All shade and flowering tree tags list common and Botanical names.

We are equipped to give you real service, and will endeavor to handle your business in such a way as to merit your continued patronage.

APPENDIX TO THE

REPORT OF THE COMMISSIONER OF THE GENERAL LAND OFFICE
ON THE PROGRESS OF THE SURVEY OF THE PUBLIC LANDS
IN THE YEAR 1871

THE SURVEY OF THE PUBLIC LANDS IN THE YEAR 1871

6. THE SURVEY OF THE PUBLIC LANDS IN THE YEAR 1871
HAS BEEN COMPLETED IN THE FOLLOWING MANNER:

THE SURVEY OF THE PUBLIC LANDS IN THE YEAR 1871
HAS BEEN COMPLETED IN THE FOLLOWING MANNER:

This is our method of "Wilt Prufing" all trees that we consider critical in handling, shipping, and storing in retailers sales yards. It is added protection against drying winds, low humidity and heat. Each bundle is immersed in this long tube (except roots) and is tagged with a wilt pruf tag.

Reports from our customers reflect their enthusiasm for this added protection, as now they are able to stock and sell deciduous trees with more confidence.

This added protection is a help—please do not think that you can abuse bare root stock, even with "Wilt Prufing." Protect your investment in trees by proper care. Keep them moist, and protected from heat, wind, freezing temperature.

And this is what we mean by "Complete Protection" of deciduous stock. Note the rainbird sprinklers over each pit of our heeling in area. (This picture was taken late in our shipping season, after most orders were shipped out.)

Modern methods and materials all contribute to better trees. Above, soil fumigation with "Vapam" before planting, for protection against nematodes, crown gall, and weed eradication. This is very costly, but assures our customers of the cleanest, disease free trees possible to grow.

DESCRIPTION OF PATENTED

F R U I T T R E E S

---ARMSTRONG VARIETIES:

PETTINGILL P.P.1352. Large rounded, deep red skin with yellow stripes. A good crisp, juicy apple. Good for eating fresh and for sauce, or pie. Does well in milder winter areas. Ripens late August.

NUGGET P.P.1651. Large, red-cheeked fruit with orange-colored flesh and good juicy rich flavor. Ripens a few days ahead of Royal. Late June.

REEVES P.P.693. A wonderful variety for mild winter climates. It should be planted with a pollinizer: Royal is suggested. Ripens early June.

PANAMINT P.P.1100. A big deep red skin, yellow fleshed freestone nectarine. Heavy bearer almost anywhere in California. Preferable to Pioneer for coastal areas. Ripening from early to mid July.

PIONEER P.P.787. The firm, juicy, orange-colored, honey-sweet flesh and the dark red skin make this a favorite nectarine. In spring it is loaded with great big beautiful rosy-pink blooms. Ripens late July.

SILVERLODE P.P.1023. Large size, early ripening freestone nectarine. Brilliant scarlet skin over creamy white and juicy flesh. Rich nectarine flavor. Does well in Southern California and Arizona. Ripens late June.

MEADOW LARK P.P.528. A good coastal and mild-winter area peach. Big golden flesh and skin with red blush. Ripens late June.

REDWING P.P.621. A large white fleshed peach, used in mild winter areas. Ripens early July.

ROBIN P.P.529. An early, crisp, white fleshed peach of honey sweet flavor. An excellent commercial peach. Ripens late May.

RED ROBIN P.P.R. Early ripening, sweet white fleshed with red skin. Good size, improved Robin. Ripens late May.

SATURN P.P.1485. A fruiting-flowering peach that is better than ever. The large double pink blossoms, set delicious golden yellow fleshed freestone peaches. Ripens mid July.

SPRINGTIME P.P.1268. A white fleshed semi-freestone that will ripen ten days earlier than Robin. Earliness and quality make this an ideal commercial peach. Ripens mid May.

SIERRA PLUM P.P.1482. Cross of Inca and Santa Rosa. The outer flesh is sweet and firm & the skin color approaches that of Santa Rosa. It is partially self-fruitful, but we recommend that it be planted with Santa Rosa for maximum yield. Ripens early July.

--STRIBLING VARIETIES:

FREEDOM P.P.1161. It's large size, rich coloring, freestone characteristic and excellent flavor make it an outstanding nectarine. A good shipping, canning, or home use fruit. Ripens late July.

BLAZING GOLD P.P.1127. An early, yellow fleshed, freestone with a rich tart acid flavor. Ripens 35 days before Early Elberta. Ripens early June.

GOLD DUST P.P.1144. A vigorous grower and consistent bearer. The developers believe this to be the finest early yellow fleshed freestone. Ripens 40 days before Elberta and is non acid. Ripens early to mid June.

--DAILY NEWS PEACHES:

3 STAR Flowering and fruiting peach. Flowers, dark pink double. Fruit large yellow fleshed, freestone. Ripens Aug. 1. to Aug.15.

4 STAR Flowering and fruiting peach. Flowers, salmon-pink, double. Fruit highly colored deep red, white fleshed freestone. Ripens June 15 to July 1.
